Our Strategy

Gunvor moves physical energy from where it is sourced and stored to where it is demanded most, using the most logistically-efficient means possible: ships, rail, trucks, and pipelines.

While Gunvor has historically been an oil trader, our company ultimately trades what is tradeable and what the market demands. Biofuels, natural gas, and renewables today account for about half of our trading volumes.

Tomorrow, what we move will be dependent on how the world reconciles affordable energy and economic development with the imperative to achieve net-zero emissions to combat Climate Change.

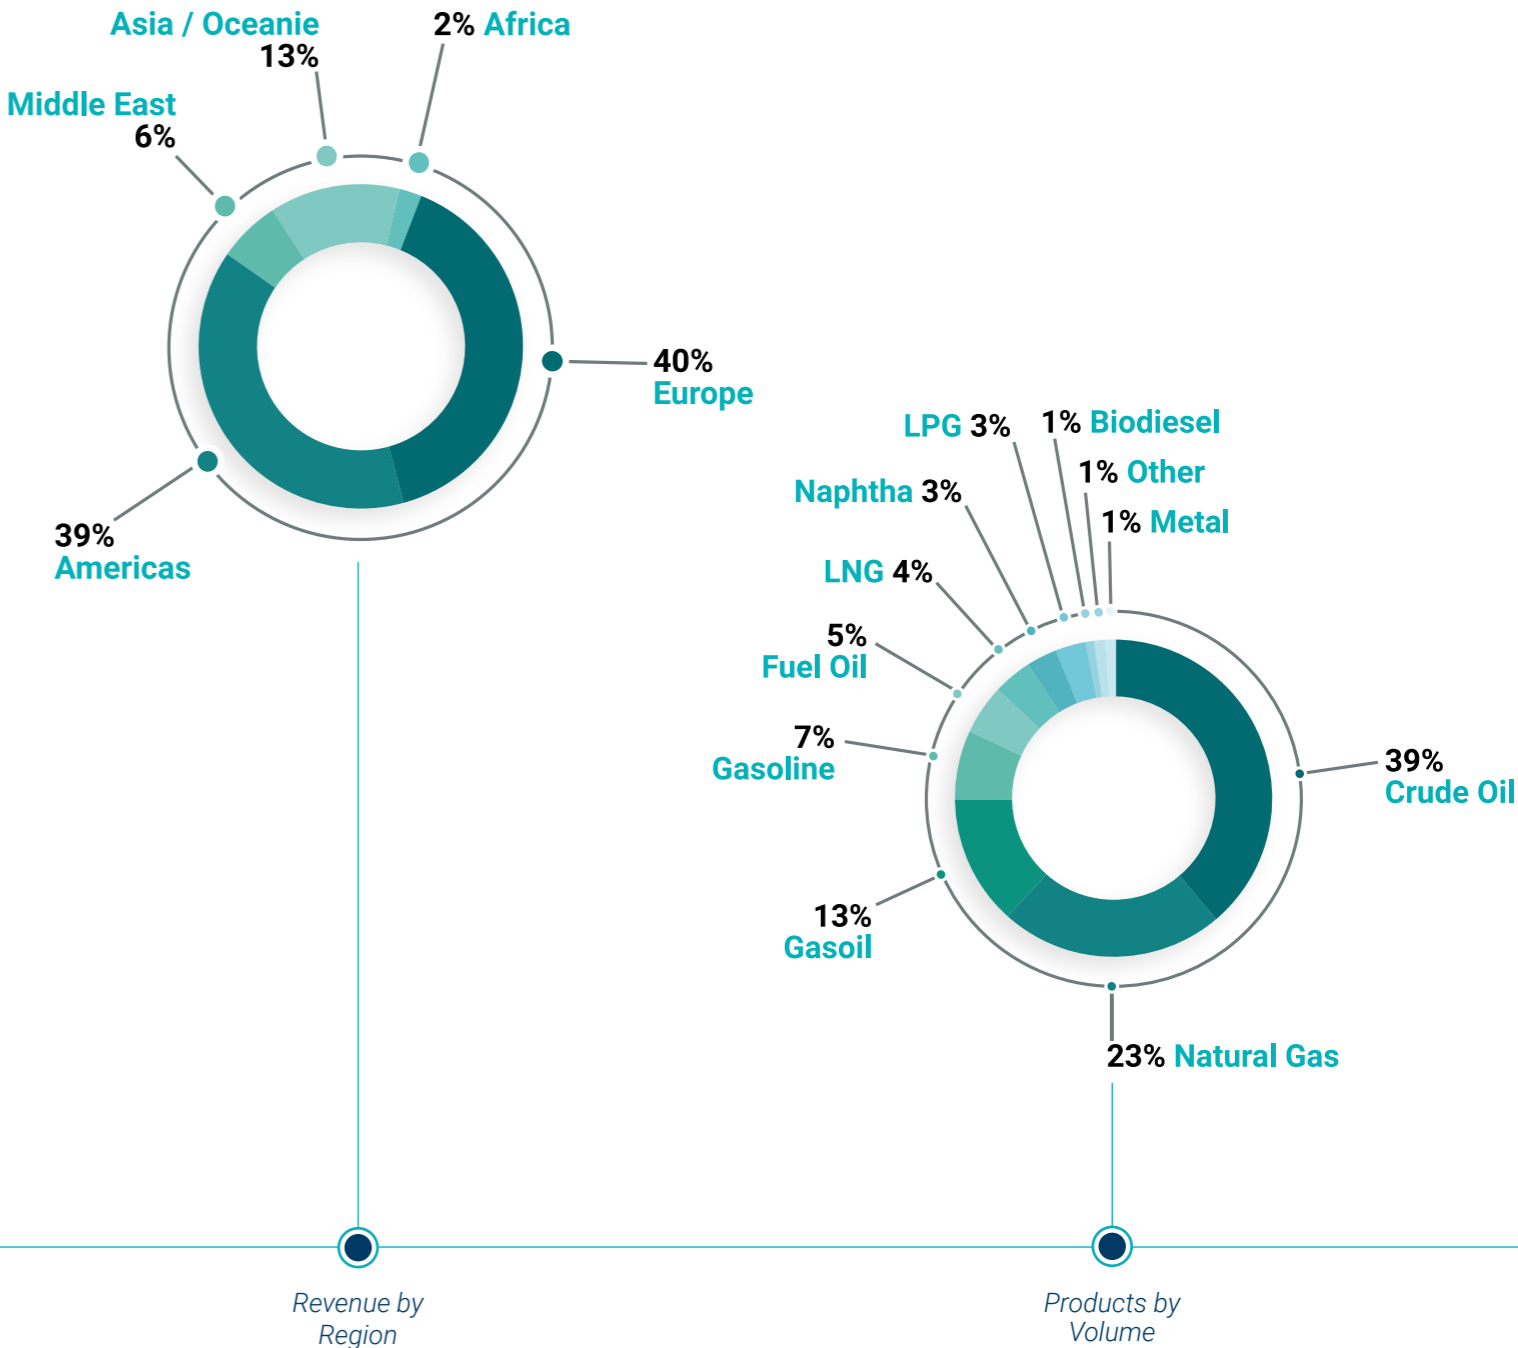

Hydrogen, ammonia, and solar are areas of potential. Gunvor has already abandoned the trading of coal. To manage the risks associated with this changing energy landscape, we prepare and adapt.

Gunvor's strength—which has enabled our company over the last two decades to become one of the largest independent traders in the world—is in being agile and entrepreneurial.

Our advanced analytics ensure for quick decision-making. Sound governance and robust Compliance limit risk. Digitization and artificial intelligence provide an edge.

Gunvor further upholds a working environment that fosters openness, cooperation, and interaction. We seek to stimulate innovation and improvement, and encourage our employees to bring new ideas and speak their minds.

For a trader like Gunvor, there are opportunities ahead to move energy forward—to grow globally, diversify our trading, and fulfil our role in the Energy Transition.

Risk Management

Managing and mitigating risk is what a physical commodities trader like Gunvor does, and it is a prerequisite for long-term success. Gunvor has a 20-plus year track record of effectively managing the risk within the ever changing commodities markets to ensure stable commercial growth and development.

A combination of policies and internal procedures addressing liquidity, credit, country, exchange rate, price, market, operational, environmental, freight, compliance and regulatory risks is the foundation of Gunvor’s control and risk management framework.

The Group has built an effective risk and control management framework with the expertise to navigate market fluctuations.

Logistics

Gunvor has invested in logistics and midstream assets that strategically complement its daily trading activity. These assets enable Gunvor to enhance the management of the sourcing and distribution components of the Group’s trading platform, diversify its income streams and strengthen its competitive position.

Finance

Managing risk and liquidity is at the core of Gunvor’s business. From the company’s inception, Gunvor has been successful in building long-term relationships in the financial sector and diversifying its banking partnerships. Today, we work with more than 75 leading global financial institutions.

As a growing business with interests throughout the world, Gunvor has always sought to establish local partnerships for its investments, such as establishing an independent revolving credit facility specifically for Asia, and creating borrowing bases in the Middle East and the Americas to finance trading operations in those regions.

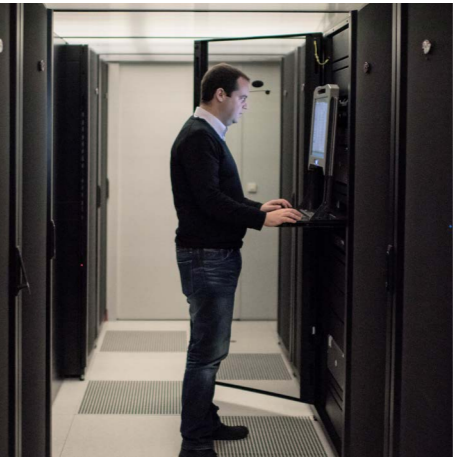

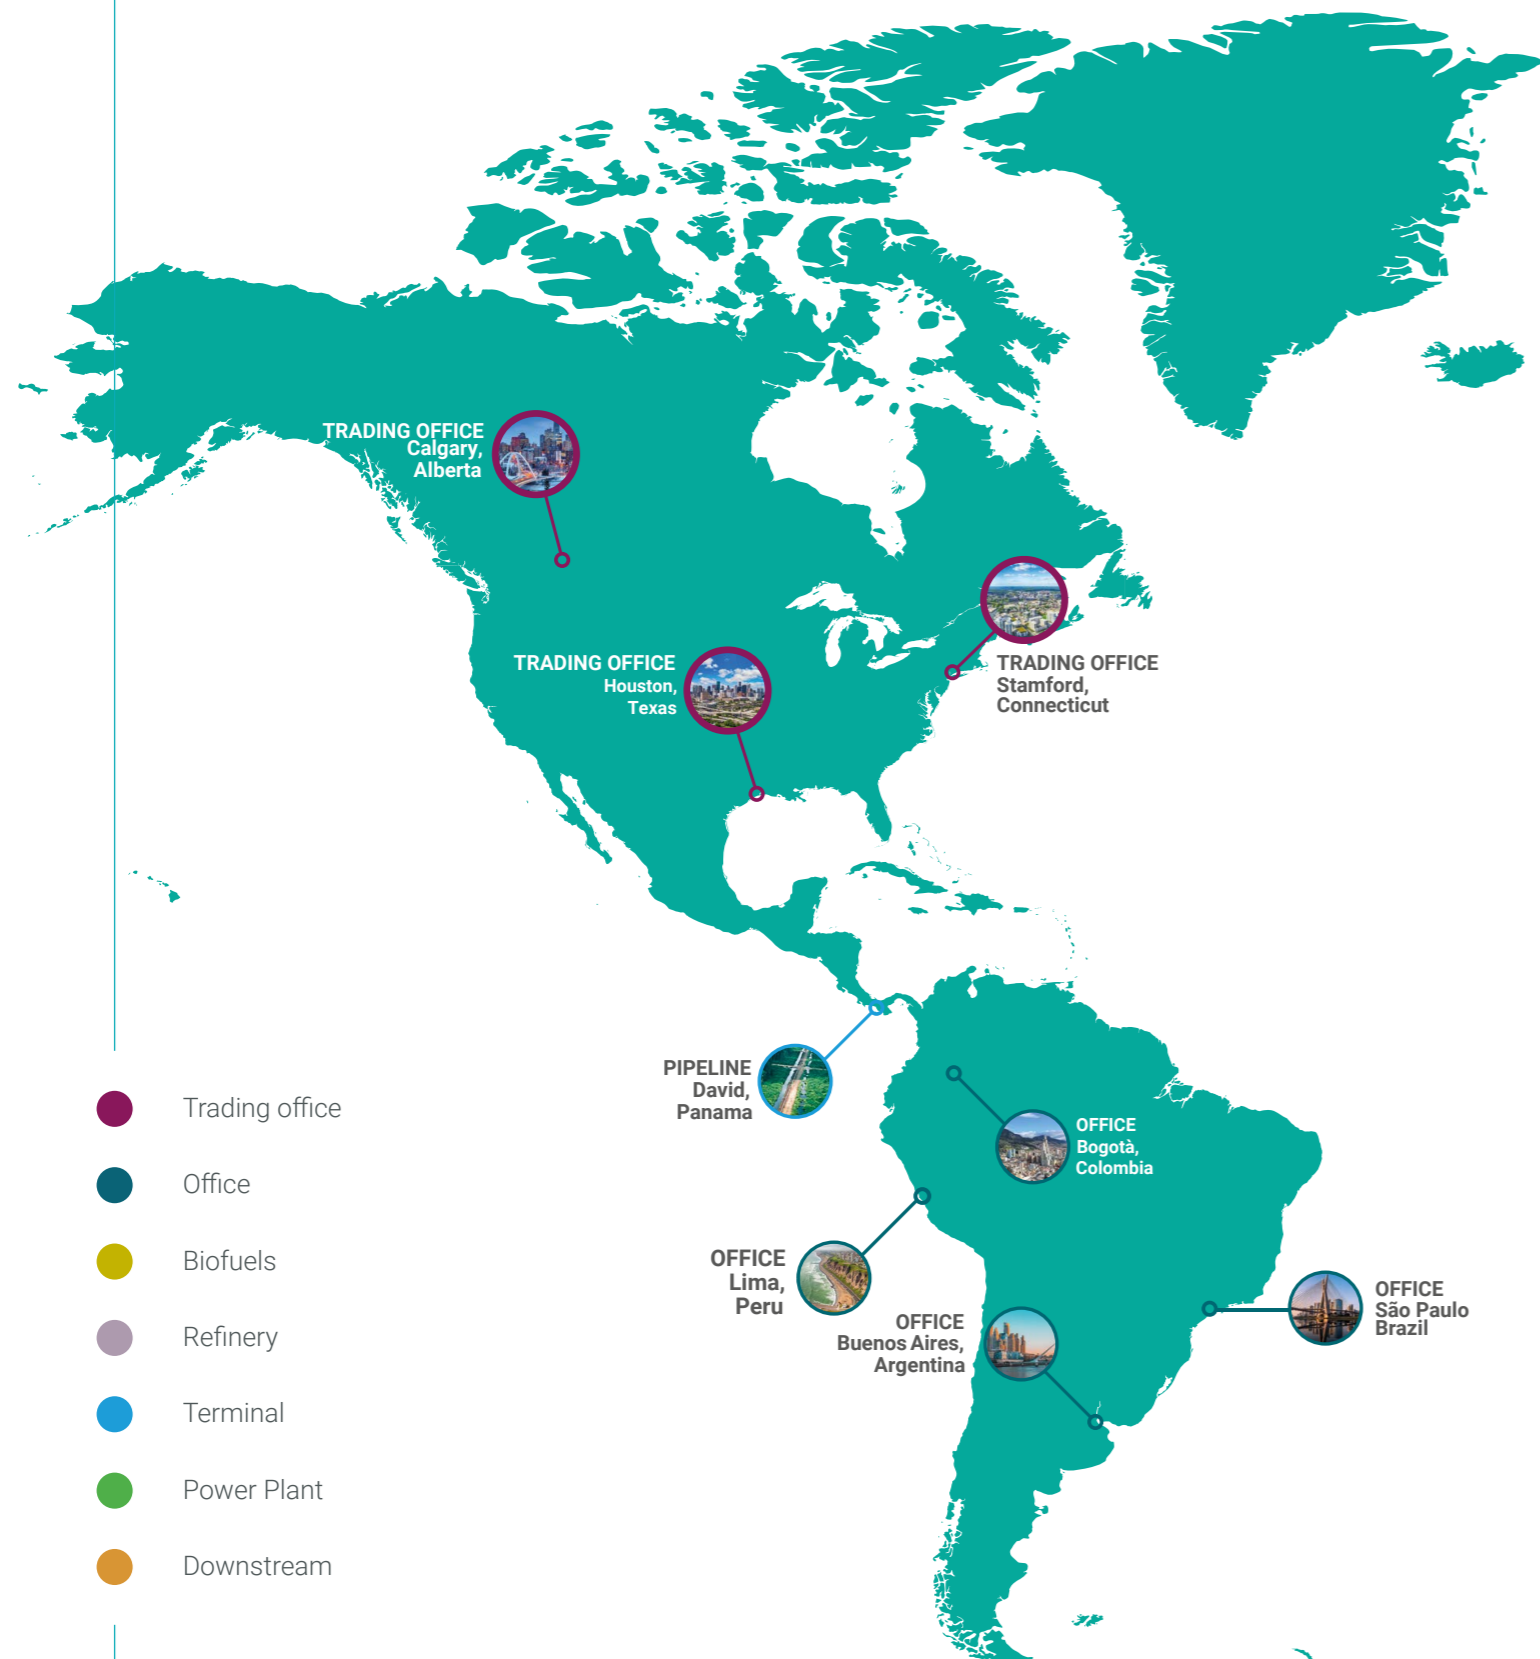

Gunvor maintains the highest information security protocols to ensure work is performed securely.

Technology

Gunvor maintains a number of advanced information systems serving our core business and supporting functions, including Risk, Trading and Financial systems, which consolidate trading positions and financial exposures globally on a daily basis. These allow management to monitor Gunvor’s overall exposure and adopt appropriate measures on a timely basis. Our operations- and assets-related activities are supported by an array of specialist applications, enabling global functions to work harmoniously regardless of location.

Physical Trading

As a physical trader, Gunvor identifies and realizes arbitrage opportunities in the global commodities marketplace:

- Geographic:** Logistics assets enable us to source physical commodities and deliver them to locations where they command higher prices.
- Product-based:** Blending adds value to products that command returns higher than the sum of their constituent parts.
- Time-related:** Storage assets, financial skills, and cost controls create margins on agreed forward prices.

Investments

Terminals

Terminals are a highly complementary asset investment for Gunvor's trading activities. They provide access to physical import and/or export flows and thus enhance trading positions.

Pipelines

Investments in pipeline assets provide us with the logistical flexibility to efficiently place different crude oil grades into various markets, enabling us to quickly take advantage of arbitrage opportunities.

Gunvor has invested in logistics and midstream assets that strategically complement its daily trading activity. These assets enable Gunvor to enhance the management of the sourcing and distribution components of the Group's trading platform, diversify its income streams and strengthen its competitive position.

Upstream

Gunvor has made select investments in exploration, appraisal, development and production assets as a part of its strategy of diversifying along the energy supply chain.

Transportation

Gunvor maintains ownership stakes in the vessels it charters, entering into joint ventures for refined products tankers. The company further invests in rail and trucking logistics capabilities.

Power Plant

Gunvor holds a 75% ownership stake in Bahía De Bizkaia Electricidad S.L. (BBE), a 785MW combined cycle power plant located in Bilbao, Spain. BBE will be integrated into Gunvor's path to ensuring a sustainable and responsible energy future, in line with the company's Energy Transition goals.

Biofuels

Investments in biofuel plants complement Gunvor's growing physical trading in the sector, as well as the company's expansion into energy transition technologies.

Downstream

Gunvor has select investments in consumer fuel retail and distribution, which supports the company's strategy of owning and investing in assets along the value chain that support core trading operations.

Storage

Investments in storage facilities for crude oil and products are an important logistical aspect of generating value around various arbitrage opportunities relating time, distance and specifications.

Refineries

Refineries complement Gunvor's trading function by creating greater operational efficiency across the supply chain, and benefit from our expertise and global relationships with feedstock suppliers.

A New Era of Trading

Nyera is dedicated to identifying Energy Transition investments, including new sustainable commodities and businesses.

- Biofuels
- Biogas / Biomethane
- Hydrogen
- Solar
- Renewable Natural Gas
- Sustainable Aviation Fuel
- Zero Emission Maritime Transportation

Nyera's trading and investment activities are performed on a commercial basis, and the company is deliberate in entering areas of opportunity that will ensure a sustainable long-term model.

*Gunvor is working to further improve the **environmental impact** of its current trading portfolio and invest in new **sustainable** commodities and businesses.*

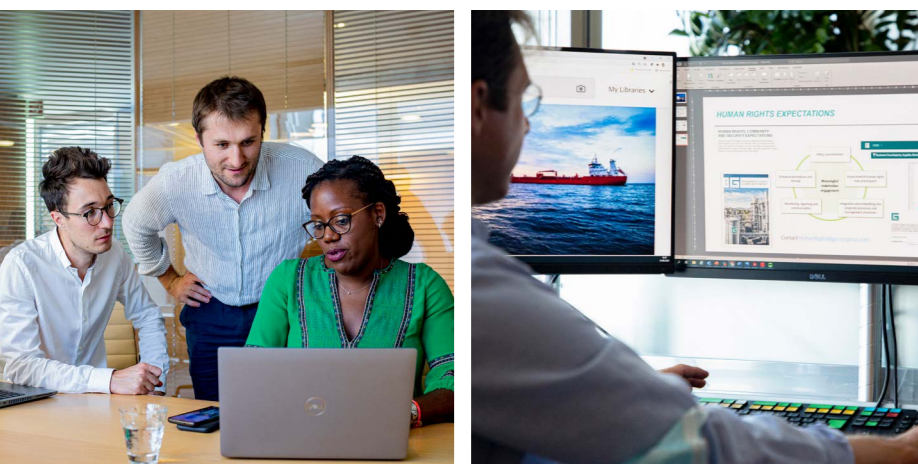

Ethics & Sustainability

At Gunvor, our goal is to maintain the highest ethical standards for how we conduct our business around the world and to comply with all applicable rules and regulations wherever we operate. “Ethics & Sustainability” outlines the many programs and initiatives that run through all aspects of our activities—from identifying new business partners to educating and empowering our employees. Our teams are working continuously to improve company procedures, while mitigating and anticipating risks within the commodities trading sector.

Culture of Compliance

Being a physical energy trader, Gunvor is subject to oversight from more than 70 regulatory authorities worldwide. Virtually every aspect of our business is affected to a greater or lesser degree by regulations covering health and safety, insurance, emission and environmental control, product, cargo and financial crime, international trade and sanctions, and banking, exchange and derivatives market rules.

To ensure compliance within such an extensive and constantly evolving regulatory environment, we maintain rigorous corporate protocols and a strict compliance program. This activity is overseen by our Compliance Department, which provides oversight, advice and training for Gunvor trading centers worldwide. In all operations, Gunvor adheres to the laws and regulations to which it is subject, both international and local, in the jurisdictions in which it operates.

In-House Experts

Gunvor today has more than 30 staff members around the world that ensure the company is adhering to ever-evolving international regulatory frameworks. Gunvor has dedicated Director positions for:

- Anti-bribery and corruption (ABC) and anti-money laundering (AML)
- Trading Compliance
- Advisory Compliance
- Sanctions Compliance

Our compliance officers are located directly on trading floors next to trading personnel. They work in conjunction with Risk Officers providing oversight for every trading desk. Gunvor’s Compliance Directors further lead the company’s Compliance training program, which is mandatory for all relevant company staff worldwide. The Group Compliance Committee oversees the effectiveness of the program.

Validation

International compliance experts regularly assist with enhancing Gunvor’s global program. Recent areas of development include our focus on Human Rights training and policy implementation globally. To ensure consistent growth in line the latest regulatory and market developments, Gunvor’s Compliance Department also undergoes regular external audits, for benchmarking and assessment, that are conducted by Big Four firms.

Careers

Gunvor’s continuing growth and success is the result of our employees, who provide a high level of commercial, operational, functional, and technical expertise across global energy markets. Our employees are dynamic and engaged.

They strive for the opportunities for growth and development that Gunvor provides. Joining Gunvor, you will work with passionate people operating at the highest level of integrity.

Culture

Gunvor is a company that works for the people who work within it. We strive to provide an environment where our employees can unlock their creativity through openness, collaboration, and interaction.

This is essential to remaining competitive and relevant, and we are always looking ahead. Shaping our company’s future, especially in the context of the Energy Transition, requires an exploration of all ideas. Gunvor is a risk management business at heart, so we appreciate that along the way new concepts will be imperfect, or even fail. It takes persistence to carry an idea to become a good business.

Diversity

As the commodities industry grows and competition ever increases, all companies look for an edge. At Gunvor, we believe this comes from diversity and inclusivity. Many studies have demonstrated that companies with a diverse decision-making base are more successful and use this advantage to spark innovation and create more ways of sustaining a competitive advantage.

Locations

Gunvor Group employs approximately 1,780 people throughout the world, consisting of about 900 experienced professionals in our offices and about 880 specialists in various logistical facilities and assets.

We have more than 20 offices, with new locations opening each year. Since 2018, Gunvor has opened new offices in Turkey, Oman, the UAE, the United Kingdom, Canada, and the United States, among other countries.

Flexibility

Gunvor maintains a flexible working environment. Having a balanced work-life schedule enables our colleagues to optimize their schedules and increase business performance.

More than 60 nationalities are represented by employees across Gunvor’s locations.

Talent

Gunvor is very selective and our standards of performance are high. We encourage creativity and independence, and strive to maintain a diverse working environment.

Our more than 20 facilities and operations are run primarily by local management, who provide keen market intelligence and analysis. They are complemented by people with high strategic value.
